Pokyny
Rozdiely vo farebnom odtieni sa môžu na objekte vyskytnúť v dôsledku štruktúry povrchu, dopadu svetla, okolitých odrazov, veľkosti zrn, vlastností podkladu, absorpčnej schopnosti, poveternostných podmienok a spôsobov aplikácie. Tieto odchýlky však nepredstavujú vadu alebo zníženie kvality. Právne nároky sú vylúčené. Štruktúra a nasiakavosť podkladu, poveternostné vplyvy a vplyvy prostredia, svetelné podmienky a kolísanie surovín môžu meniť farebné odtiene a neoprávňujú k žiadnym právnym nárokom. Na mieste treba vyhotoviť vzorové plochy, aby sa dala vyskúšať ich farebná presnosť v suchom stave. Pri opakovaných objednávkach sa môžu vyskytnúť mierne farebné odchýlky napriek prísnemu monitorovaniu výroby. Aby sa pri dodatočných objednávkach minimalizovali farebné odchýlky, je potrebné materiál z doobjednávky zmiešať resp. porovnať s originálnou dodávkou. Uskutočniteľnosť farebných odtieňov predstavuje nezáväznú orientáciu. Hodnoty RGB (červená/zelená/modrá) sú približné hodnoty pre plánovacie a grafické programy a nie sú zaručené. Odchýlky spôsobené rôznymi koncovými zariadeniami alebo špeciálne vytlačenými verziami tohto dokumentu sú preto nevyhnutné. Je potrebné dodržiavať naše technické listy, karty bezpečnostných údajov a pokyny na spracovanie. Platia naše Všeobecné obchodné podmienky.
